

ANTONIO MORALES ZÚÑIGA

Computer Engineer

Developing innovative and efficient solutions to different problems is what I do. For this, I have used technologies such as Laravel and CodeIgniter, different DBMS: Oracle, PostgreSQL, MariaDB, SQL Server, as well as Apache servers, all mounted on a Debian system. The use of Bootstrap, jQuery and Vuejs have been useful if we talk about the Front-end. The use of git as a versioning tool has been key.

TECHNOLOGIES

Laravel	CodeIgniter
PostgreSQL	Shell Script
Bootstrap	Git
jQuery	Oracle
Vuejs	<u>MariaDB</u>
Debian OS	SQLServer
Apache2

EXPERIENCE

04/2022 - TODAY

Secretaría de Administración y Finanzas

HEAD OF DEPARTMENTAL UNIT.

OPERATION OF INTERNAL ADMINISTRATIVE SYSTEMS.

Development of modules using technologies such as Bootstrap, Vuejs and jQuery in the Frontend, with their respective sections in the Backend in Laravel.

Integration to working templates such as Metronic.

Resolution of administrative processes.

Analysis of information in PostgreSQL databases.

Immediate response to errors.

Development of REST API's.

API's consumption.

Planning and development of small projects.

Leadership and responsibility over a team of programmers and administrators.

Use of git as a versioning tool.

Administration of systems in production.

Laravel systems maintenance.

Updating Laravel systems.

Use and basic administration of Apache2 servers mounted on Debian systems.

10/2021- 03/2022

Secretaría de Administración y Finanzas

Operating Technician PR C

Analysis of information in ORACLE databases.

Frontend development using jQuery and Bootstrap frameworks.

Backend development using Laravel and CodeIgniter.

Maintenance of systems developed in CodeIgniter.

Migration of systems developed in CodeIgniter to Laravel.

10/2019 - 10/2021

Fideicomiso de Recuperación Crediticia de la CDMX

Operating Technician

Development of Stored Procedures in Microsoft SQL Server.

Migration of systems developed in Visual Fox Pro 2 to WEB environments.

Backend and Frontend development for Financial Information delivery.
